

CONERCON ENERGY SOLUTIONS

'Green Energy' is the Only Way Out of the Energy Crisis

The great energy crisis, which has been intensified by the effects of the prolonged war in Ukraine, makes the switch to renewable energy sources (RES) more necessary than ever. The International Energy Agency has emphasized the essential role that RES can play in energy security and has called on governments to reduce paperwork, speed up the delivery of licensing and provide the proper incentives for the faster development of renewable energy sources. In Cyprus, companies operating in the sector have long been ready to contribute to increasing the incorporation of RES in the country's energy balance. Such a position is firmly aligned with the principles of Conercon Energy Solutions, a subsidiary of Lanitis Energy. With over 18 years' experience in the Cypriot solar energy market, Conercon Energy Solutions plays a leading role in the field of Photovoltaic installations, production and methods of energy conservation, both in residential and in commercial and industrial projects. Conercon Energy Solutions calls for the use of solar energy as a priority, describing the shift to 'green energy' as the only way to reduce dependence on traditional forms of energy and reverse the effects of

climate change that threaten the planet. Fully utilizing the latest technologies in the field of production and energy conservation through the use of solar energy, the company is considered a pioneer in the design, sale, installation and maintenance of large-scale photovoltaic parks, as well as high-standard systems for residential, industrial and commercial projects.

It is worth mentioning that, to date, Conercon Energy Solutions has:

- successfully implemented installations of photovoltaic systems exceeding 80MW
- served more than 10,000 households and 50 industrial/commercial buildings, reducing their electricity consumption
- installed and maintains large photovoltaic parks with a total capacity of over 40MW

The company offers a variety of products for all types of installations, perfectly combining all the relevant factors to realize its ultimate goal: the highest efficiency of the systems, assurance of quality and the necessary guarantees to investors.

Conercon Energy Solutions follows a long-term strategic plan, through the careful selection of partners and suppliers in Cyprus and abroad –

WITH OVER 18 YEARS' EXPERIENCE IN THE CYPRIOT SOLAR ENERGY MARKET, CONERCON ENERGY SOLUTIONS PLAYS A LEADING ROLE IN THE FIELD OF PHOTOVOLTAIC INSTALLATIONS

including the most notable names in the global renewable energy industry such as Luxor, Bauer, Azzurro, Huawei, Kostal, Tigo Energy, SolarEdge and Muskita.

In fact, it has concluded longstanding agreements with all the companies with which it cooperates and represents them as an Authorized Service Partner in the Cyprus market, for the immediate response and solution to any problems that may arise in the operation of photovoltaic systems.

With a stellar technical department, both in terms of equipment and workforce, and the relationships of trust that it builds with customers, Conercon Energy Solutions firmly stands by its clients after the initial investment, providing the entire range of services, technology, and expertise in the renewable energy field.

Services include:

- Residential and Commercial Photovoltaic Systems
- Net Metering & Net Billing
- Installation of Large Photovoltaic Parks
- Maintenance of Photovoltaic Parks
